

«Salt» SW-78

Smartwatch «Salt» SW-78

This smartwatch is for those who often use an audio player and sometimes want to get away from a smartphone. Let the whole world wait! You can jog with your favorite playlist on, or walk with an audiobook - just sync your watch with your smartphone and leave the phone at home. 512 megabytes of internal memory are enough to store audio files. The battery is enough for 6 hours of continuous audio playback. The built-in player supports multiple audio formats and its controls are displayed on the watch face. You can connect the watch to Bluetooth headphones or an external Bluetooth speaker. It is completely waterproof and suitable for swimming. This smart gadget records your steps and syncs the data with the Canyon Life application. All the required notifications from social networks and messengers are displayed on the watch upon synchronisation.
