Canyon BPA-5 is the perfect urban backpack for you and your 15-inch laptop. We designed this backpack to look smart and took care of versatility. Just make sure to use up all the pockets it has: five outside and five internal ones. The interior has two separate inner compartments and a laptop sleeve. All your goods will be safe & dry due to the waterproof material we used for this item. It gets even better – an additional side zipper facilitates access to the things you need the most! Pretty cool, huh? Comfort above expectations. An additional side zipper provides easy access inside, so you can pack tight and still have all the necessities at your disposal. Smart organization for your everyday essentials. We added a lot of pockets, and now you can organize your everyday carry in any imaginable way. Five pockets inside, five pockets outside, two separate internal compartments, and a designated sleeve for your 15.6" laptop!
