### MODEL

CNE-CPB2002B	black	5291485009403
CNE-CPB2002W	white	5291485009410

This is a powerful energy storage just for you. No jive, just 20000mAh of power for your devices in a very convenient form factor.

The Type-C port is input and output, and it's Power Delivery. You'll charge your devices three times faster and recharge the power bank just as quickly. Nice thing to have when you're always on the move!

Two USB-A ports support Quick Charge 3.0 – you can charge multiple devices at once. The built-in status display will tell you if fast charge mode is active and help you monitor the percentage of power left.

We also used a Smart IC here. It can detect your device and cable capacity and optimize voltage. It also protects your gadget from short-circuiting, overheating, and other threats.

With the Type-C cable included, it's going to be your dependable helper!
