## Lightning Charging Cable With Magnetic Rotating System

Are you tired of looking for your discharged iPhone by touch - at night or in your car? Just put the connector into "lightning" slot, and the round magnetic contact of the wire will "find" it on your desktop, under a car seat, on a couch or in a chair. Besides, this charging method is protective and dirt-proof. You can charge two devices at the same time by connecting one wire to two different magnetic connectors, regardless of their standard. An ideal solution for those who value speed, convenience, and functionality!

### Model
