

CNS-CMSW14

Convenient Wireless Mouse With a Gaming- grade Sensor

This wireless mouse is designed for those who have to work at the computer for a long time. Its ultra-precise Pixart 3212 optical sensor is widely used in the gaming industry and ensures optimal cursor operation on various screens. The shape and size of this right-handed mouse are maximally thought out from the perspective of ergonomics, providing the highest convenience of usage. The mouse is covered with a durable, pleasant rubberized coating with double molding technology which ensures that it is firmly settled in the hand and your fingers won't slip off. 6 buttons, modern gaming-grade optical sensor, 5 DPI switching levels and original Canyon colors - this mouse will serve as an excellent tool for completing a wide range of tasks.
