

CNS-CBTSP4

Wireless Speaker-Transformer

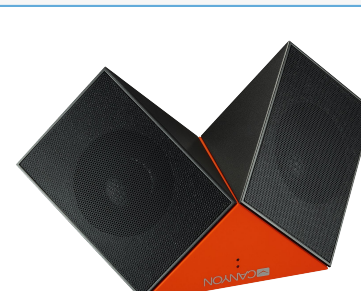

This wireless bluetooth speaker is pure fun. Get it into a right shape by rotating its sections in 360°. Cool and simple: the shape impacts the sound and sets the right mood for you and your friends. Bluetooth 4.1 establishes good 10-meter range connection and powerful battery provides near 5 hours of playtime. Even though Bluetooth is the main way to connect this speaker, its Micro-SD card slot and AUX plug ensure compatibility with all types of devices, not even equipped with Bluetooth. Handsfree function helps you to take calls and talk to your friends while listening to your favourite tunes. Shape your music experience in the right way!
